

c10 (110 - 150, f-test 50%)

Median $(\mu_{\text{fit}} - \mu_0)/\sigma \mu_{\text{fit}}$ (%), c10, 125 GeV

Median $(\mu_{\text{fit}} - \mu_0)/\sigma \mu_{\text{fit}}$ (%), c10, 125 GeV

- Moving to 50% threshold on f-test, lower bias against SumPoly
- If we ignore Bernstein, any function works
