

c5 (110 - 150, f-test 50%)

Median $(\mu_{\text{fit}} - \mu_0)/\sigma \mu_{\text{fit}}$ (%), c5, 125 GeV

Median $(\mu_{\text{fit}} - \mu_0)/\sigma \mu_{\text{fit}}$ (%), c5, 125 GeV

- Moving to 50% threshold on f-test, lower bias against SumPoly
- Bernstein fits nothing, and nothing fits Bernstein - ignore
- Leaves BWZRedux unbiased against everything
