

c12 (110 - 150, f-test 50%)

Median $(\mu_{\text{fit}} - \mu_0)/\sigma \mu_{\text{fit}}$ (%), c12, 125 GeV

Median $(\mu_{\text{fit}} - \mu_0)/\sigma \mu_{\text{fit}}$ (%), c12, 125 GeV

- Moving to 50% threshold on f-test, lower bias (agrees with MIT)
- Changed from BernsteinFast(3) to (5)
- BWZRedux right at the bias edge (20%), a bit higher vs. SumPoly
