c11 (110 - 150, f-test 5%)

Median $(\mu_{fit} - \mu_0)/\sigma\,\mu_{fit}$ (%), c11, 125 GeV
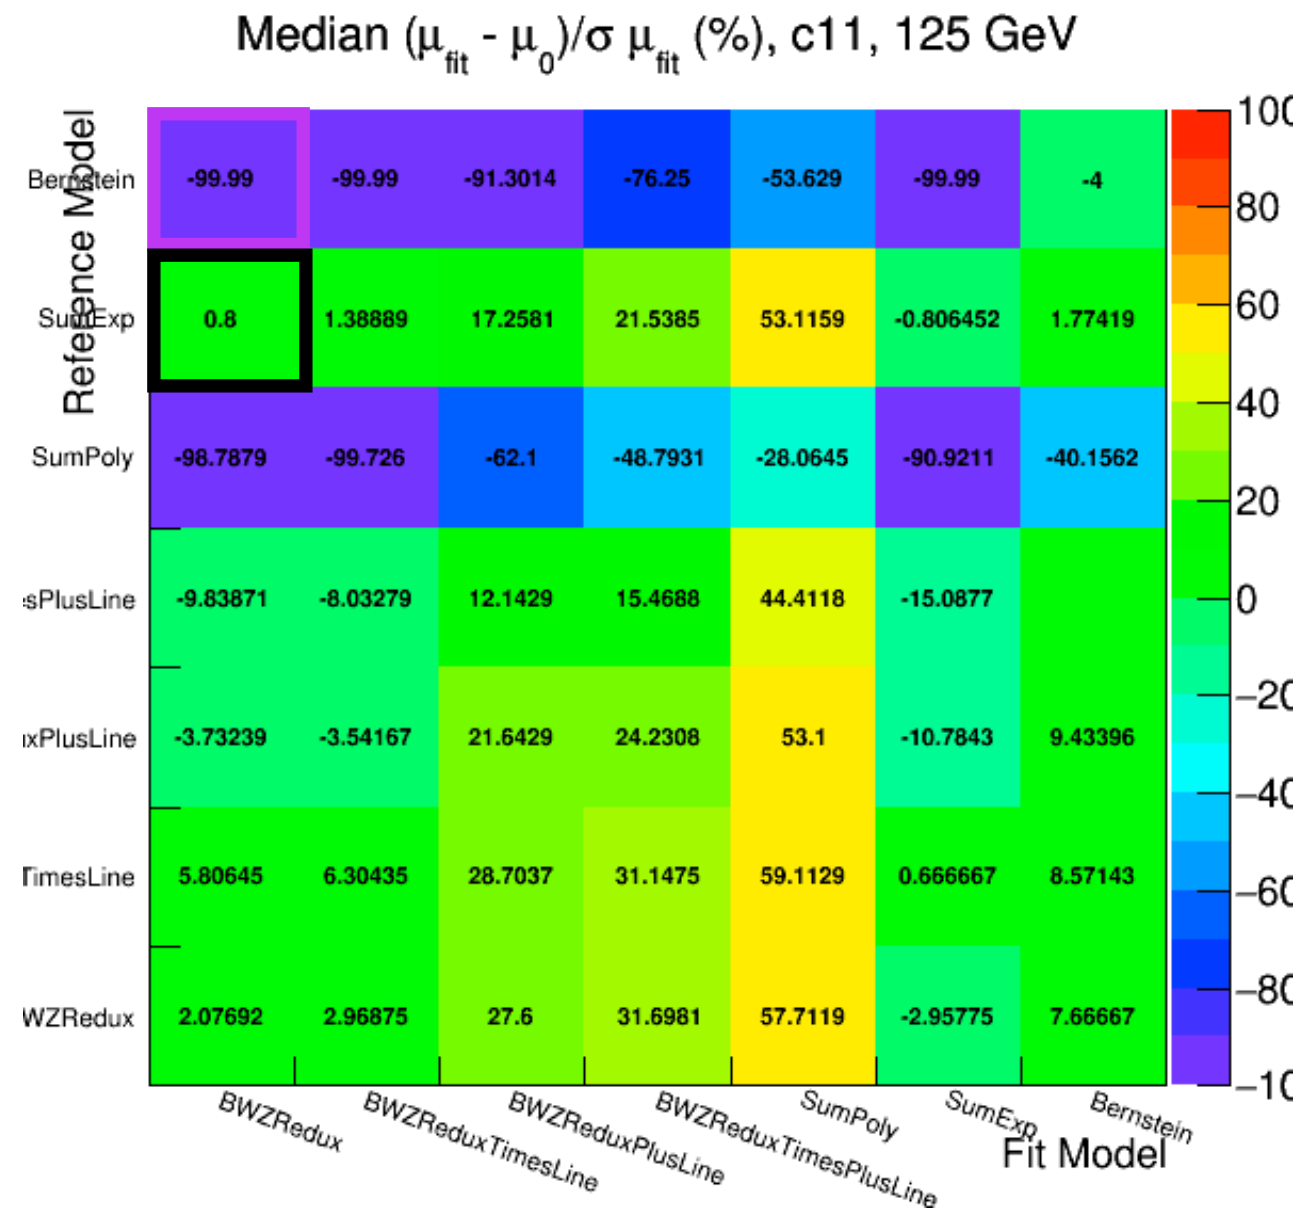

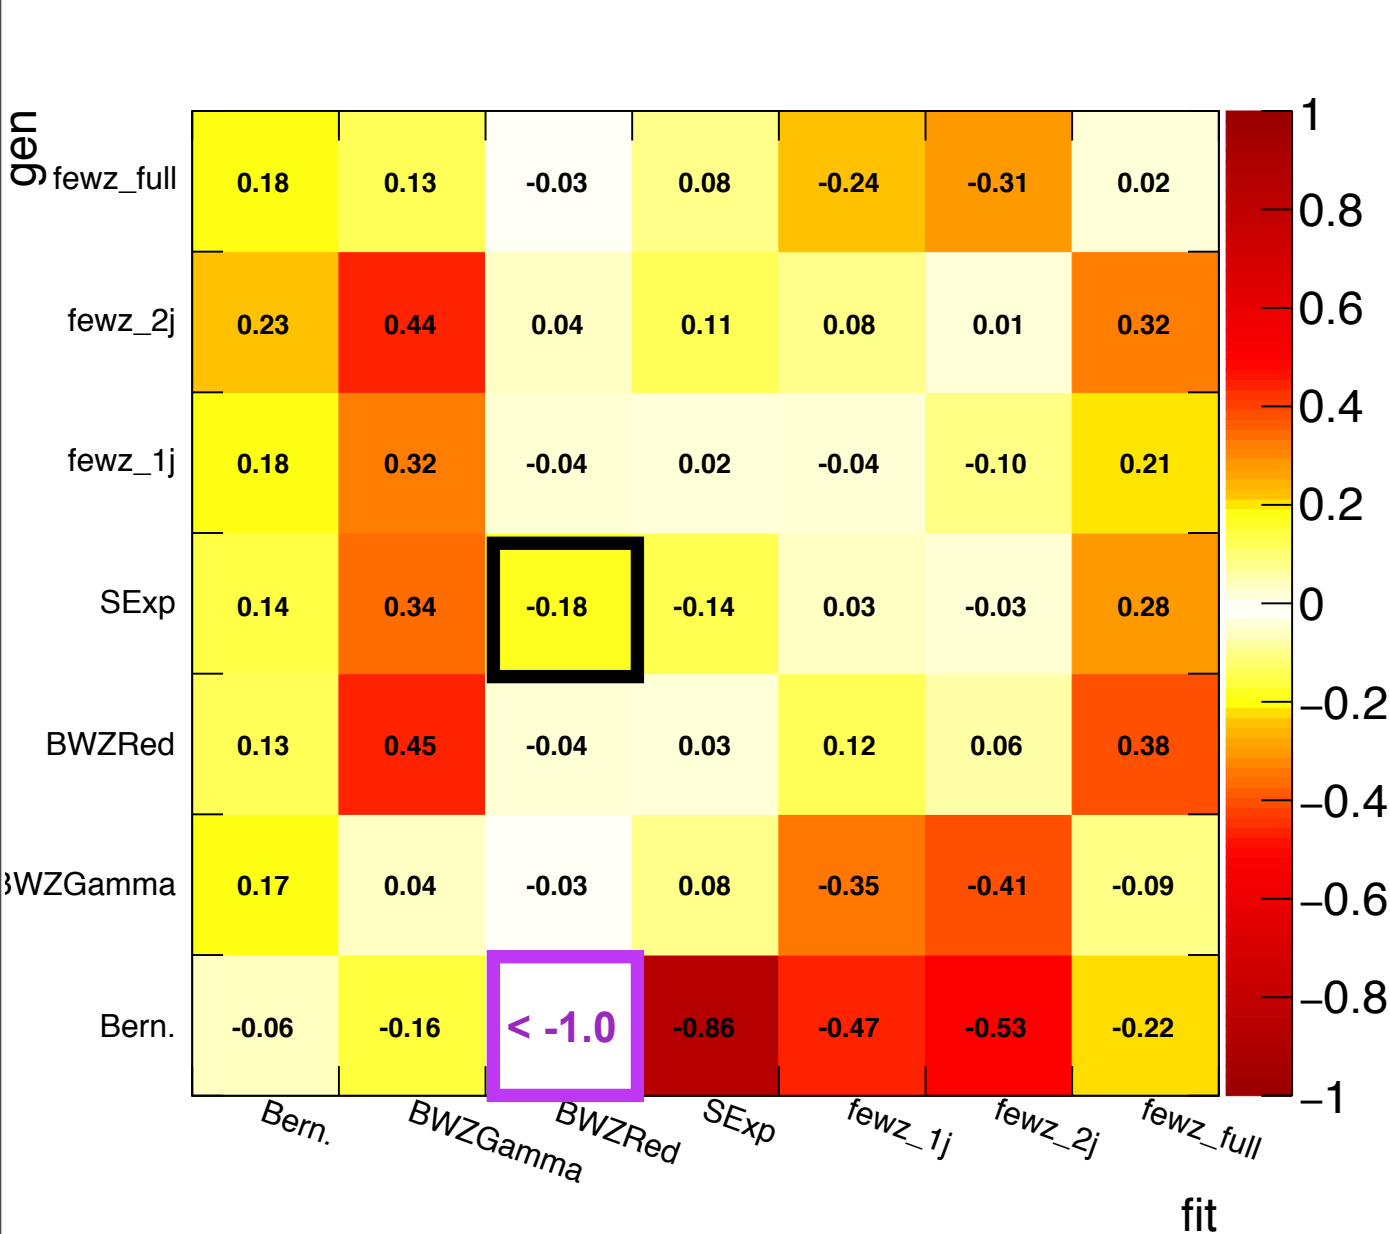

- MIT & UF both low vs. SumExp, UF large vs. Bernstein

- Use Bernstein (since it fits everything), or ignore it (since nothing fits it)

- No change moving to 50% f-test, except that Bernstein needs > 8 orders
